CN Lab 5

DHCP within lab

- DHCP uses UDP as transport layer protocol
- We make server as DHCP server so that all end devices dynamically get IP address.

Outcomes

- We learnt to make DHCP server
- How to dynamically assign IP address to end devices
- DHCP DORA process stand for following messages between client & server.

message flow b/w DHCP client

We configured the server but the static, end range, no of users after learning DNS ON in DHCP & see that IP address is configured.
